DOKUMEN CONTOH UNTUK UJIAN SISTEM (SIT) - BUKAN DOKUMEN SAH / TEST SAMPLE ONLY

Financial Model - Kilang Baja Organik Sisa Sawit, Gambang - Test

Project: Kilang Baja Organik Sisa Sawit, Gambang - Test
Sponsor: FELCRA (test organisation ORG-MYS-1FF17D84)
Projection period: 7 years, FY2027 to FY2033 (2027-2033)
Prepared: 20 October 2026

Revenue assumptions

- Organic fertiliser from palm oil mill waste (empty fruit bunch and POME sludge).
- Output 3,000 tonnes in 2028 rising to 9,000 tonnes a year from 2031.
- Ex-factory price RM 420 per tonne (bagged, 50 kg).

Cost assumptions

- Capex RM 2,400,000: plant building and composting bays RM 1,500,000; shredder, mixer and bagging line RM 600,000; working capital RM 300,000.
- Land contributed by the asset owner under Musharakah (agreed value RM 900,000).
- Wheel loader leased under Ijarah at RM 6,500 a month.
- Opex RM 420,000 a year plus RM 150 per tonne after start-up.

Year	Revenue (RM)	Opex (RM)	Operating profit (RM)
2027	0	180,000	-180,000
2028	1,260,000	948,000	312,000
2029	2,520,000	1,398,000	1,122,000
2030	3,360,000	1,698,000	1,662,000
2031	3,780,000	1,848,000	1,932,000
2032	3,780,000	1,848,000	1,932,000
2033	3,780,000	1,848,000	1,932,000

Cumulative operating profit 2027-2033: RM 8,712,000.00. Net margin from 2031: 51%.
